6:30 PM to 8:30 PM

Rockaway Institute for a
Sustainable Environment
(RISE) Center

58-03 Rockaway Beach Blvd
Far Rockaway, NY 11692

Join the Science and Resilience Institute at Jamaica Bay and its partners for

CLIMATE FORUM SERIES:

BEAT THE HEAT

What is a heat wave and how hot can it get?

What is “urban heat island effect”?

How can heat affect my health?

What can I do to prepare?

Summer means outdoor fun. Summer also means heat waves, which can be dangerous and deadly.

Heat is one of the leading weather-related killers in the U.S. In New York City, more than 80% of heat stroke deaths involved victims who were exposed to heat in homes without air conditioning.

Learn about heat waves, how hot they can get in New York City, how heat affects your body, and how you can prepare yourself for extreme heat situations.

Please register for this **FREE** event at:
